---

As a graduating high school senior, I will be starting my journey at Boston University to pursue a degree in computer science with a focus on AI and machine learning. While I am excited to dive deeper into the world of technology, I also have a desire to explore different industries and gain diverse experiences. This summer, I am seeking a job where I can utilize my personal skills and continue to develop new ones. I believe that trying something new will broaden my perspective and allow me to grow both professionally and personally.

## WORK EXPERIENCE

---

### Convent & Stuart Hall

2021 – 2023

*Various Technology Roles and Promotions*

*San Francisco, CA*

*Technology Assistant*

Jun. 2022 – Aug. 2022

- Facilitated faculty device transfers by moving their data and preparing their new computers.
- Set up new devices across campus like TVs in every classroom.
- Organized an e-recycling program for the school's students and administration.

*Technology Intern*

Jun. 2021 – Aug. 2021

- Updating, organizing, and preparing hundreds of devices for my school.
- Manipulation of Google Sheets to store information about each device.
